I. INTRODUCTION

A. General Information

The Las Virgenes Municipal Water District (District) serves the western edge of Los Angeles County including the cities of Agoura Hills, Calabasas, Hidden Hills and Westlake Village. The district occupies 122 square miles and services a population of approximately 70,000. The District provides potable water, recycled water, and sanitation (wastewater) services to its customers through three separate enterprise funds. The sanitation and recycled water services are provided through a Joint Powers Authority with the Triunfo Sanitation District.

Las Virgenes Municipal Water District is organized under the Municipal Water District Act of 1911 (California Water Code 7100). A five-member board of directors, each elected by geographic divisions, provides governance. Directors serve overlapping four-year terms, and every two years - concurrent with installation of the newly elected board – they select board officers. The board also selects a local representative from LVMWD to serve on the Board of Directors of the Metropolitan Water District of Southern California.

The District is requesting proposals from qualified firms or consultants to provide landscape and irrigation design and installation services.

To be considered, the proposal must be received electronically by **5:00 p.m. on August 1, 2024** to:

Alexa Hendricks
Resource Conservation Supervisor
ahendricks@lvmwd.com

Proposals received after the above date and time will not be considered. Submitters will receive an email confirmation of receipt of the proposal. The District is not responsible for emails that fail to deliver regardless of the cause of the failure.

B. Background

In November 2018, the District's water treatment facility at the Las Virgenes Reservoir located at 32601 Torchwood Place in Westlake Village, CA was severely damaged by the Woolsey Fire. The structure has since been repaired, but the 13,000 square feet of landscaping surrounding the facility has remained unplanted. The District desires to install a sustainable, firewise demonstration garden to enhance the aesthetics of the property, improve slope stabilization, and provide the community with an example of smart, climate-appropriate landscaping for homes and commercial applications adjacent to wildfire prone areas.

The District is seeking a highly qualified landscape architect/designer and installation contractor to perform the various items as outlines below in the Scope of Services.

A. Site Assessment

B. Landscape Design:

- Develop basic concept design to help envision how selected plants will appear in the landscape and imagery necessary for obtaining approval from relevant authorities.
- Landscape designs must have an average plant factor of 0.55 or less and may only include moderate, low, and very low water use plants, as specified by the Water Use Classification of Landscape Species (<http://ucanr.edu/sites/WUCOLS/>).

- Craft a detailed landscape design tailored to the site, taking into account factors like soil conditions, topography, existing structures, and existing trees and other non-turf vegetation.
- Ensure the design is in compliance with current requirements set forth by the Model Water Efficient Landscape Ordinance.
- Ensure remaining trees and other plants are properly irrigated to maintain their health.
- Conduct up to three revisions of the landscape design.
- The final design will include a planting plan, irrigation design, soil management plan, and grading design.

E. Installation

- Contractor will install landscaping according to the agreed upon landscape design and adhere to the requirements below.

 - New landscapes will consist of a minimum of 50% plant material, with no more than 25% hardscape.
 - Contractor will ensure variety and diverse plants are installed which will represent at least 50% of total landscape at full plant maturity
 - The project does not allow for fescue, Bermuda grass, turf looking grasses, artificial or synthetic turf, or any invasive species
 - All exposed soil surfaces must be covered with non-bark mulch, rock, or decomposed granite.
