CURRENT RESERVOIR CONDITIONS

NOTICE TO STATE WATER PROJECT CONTRACTORS**Date:** JAN 18 2017**Number:** 17-01**Subject:** 2017 State Water Project Allocation – 60 Percent**From:**

A handwritten signature in blue ink that reads "Mark E. Andersen".

Mark E. Andersen
Acting Deputy Director
Department of Water Resources

The Department of Water Resources (DWR) is increasing the allocation of 2017 State Water Project (SWP) water for long-term contractors from 1,894,645 acre-feet to 2,536,267 acre-feet. Based on recent precipitation, runoff, and current water supply conditions, SWP supplies are projected to be 60 percent of most SWP contractors' 2017 requested Table A amounts, which totals 4,172,786 acre-feet. Attached is the revised 2017 SWP 60 percent allocation table.

This allocation increase is made consistent with the long-term water supply contracts and public policy. DWR's approval considered several factors including existing storage in SWP conservation reservoirs, SWP operational constraints such as the conditions of the recent Biological Opinions for delta smelt and salmonids, and the longfin smelt incidental take permit, and 2017 contractor demands. DWR may revise allocations if warranted by the year's developing hydrologic and water supply conditions.

Unless SWP contractors submit revised schedules, DWR will use the initial 60 percent delivery schedules that were previously submitted in October 2016. DWR will send the updated monthly water delivery schedules to the long-term SWP contractors.

If you have any questions or need additional information, please contact Craig J. Trombly, Acting Chief, State Water Project Analysis Office, at (916) 653-4547.
